

Cpr E/S E 491 May1639 Weekly Report 6

Web platform for collecting and indexing publicly available information about common Java files.

Reporting period: October 6th - October 12th

Advisor/Client: Professor Rajan (Com S)

Members: Evan Dye (Team Leader)
Arik Coats (Web Master)
Robert Kloster (Communication Leader)

Weekly Summary

- Decided on the forum software to be used for the first version of the prototype.
- Begun personal development training in PHP and MySQL.
- The group website now redirects to the previously established GitHub site.

Goals for next week:

- Build a functional (if temporarily limited) prototype of the specification forum.
- Begin developing the design documents.
- Continue developing a system to extract class and method source code.

Name	Hours Spent	Contributions	Results
Evan Dye	3	Worked with Putty's SFTP tools change the May1639 website. Further examined various forum software.	The project site now redirects to the GitHub site.
Arik Coats	3	Gained experience with GitHub and compared various options for our forum software. Determined what languages to study.	After comparing many options for forum software, we settled on MyBB. Determined that we need to gain experience with php and MySQL.
Robert Kloster	3	Gained more GitHub experience, assessed viability of various forum software packages, determined languages to learn/brush up on.	Given the comparative traits of the various forum software packages, we have determined that MyBB is both a sufficient and

			currently ideal choice. As MyBB is based on PHP and MySQL, the team may wish to learn (or re-learn) them.
