- Refine forum behavior based on feedback.
- Begin work on the Design Document, due October 28.

Name	Hours Spent	Contributions	Results
Evan Dye	6	● Installed MyBB on the project web site. ● Formatting and setting up a prototype demo for the specifications forum. ● Researched hierarchal structure of forums stored on the database, ability to store source code within forums, and viability of searching for methods, classes, or libraries. (It was a real team effort, we all had a hand in each part.)	We now have a prototype of our forum to expand on. Currently awaiting feedback for what changes to make.
